My message has been over the last several months is that our association SWICA, we be changing things. Which was requests made to us from our members. Since our last newsletter in December here’s what we have been doing. First I would like to say this. Back in one of my first Presidents message articles I mentioned to look at the word “Association” defined as “an organized body of people who have an interest, activity or purpose in common.” I cannot express how much this is true. The support and excitement I have seen, people I have heard from, conversations had, suggestions made regarding our association on how to make truly “better serving” has been positively overwhelming. SWICA is alive!

January and February very busy for SWICA. On Jan. 15th SWICA held its Byron Sadler Cryro craft competition at Rilco Manufacturing. A very special Thank You to Ken Zagorski and his entire Rilco team allowing us to host this event at his place. On February 7th is our 2019 Expo and the second portion for the Bryon Sadler Craft completion at the Pasadena Convention Center. We are very excited for this event being

Plan to be there early for first seminar and stay the day visiting exhibitors and watching two rounds of the rigid, removable and commercial insulation installers competition. Free lunch 11:30 to 2:00 PM. Sign up to attend seminars at www.swicaonline.org today!

**10:00 – 11:00 AM – Peter Beard, Greater Houston Partnership, Workforce program**

**Noon – 1:00 PM – Ron King, National Insulation Assoc. Thermal Insulation Inspectors Program Certification**

**2:00 – 3:00 PM – Michael Bergen Industrial Info Resources Update Gulf Area**

(Continues page 2)
literally “sold out” with the number of exhibitors that will be in attendance. The purpose and sole message of our Craft competitions is showcasing the “importance” of the craft is the key to a properly installed insulation system by skilled, trained and experienced insulators. Of course with our Expo it allows everyone to attend educational seminars see products, services and people that makes our industry one of a kind.

How do you sadly announce to the end of an era and be excited all at the same time? On page 13 of this newsletter it is said. This will be the last PRINTED and mailed SWICA newsletter. We have elected to go electronic. Next newsletter(s) from this
2019 Cyrogenic Competition Winners!

1st Place Petrin LLC- Felipe Serrato, Jesus Ojeda and Tomas Loredo and Expo Chair Petrin's Jay Bridgewater

Second Place Apache Industrials David Patrick with Axial Medina, Eduardo Cintron & Robert Roshto

3rd Place - BrandSafway Rey Quinoez, Juan Lozano & Jose Quinoez

Thanks to Judges Bobby Ferrell-OC Foamglas, Toby Grebe-SPI, Howard Lavender-Dow, JD Page, Thermal Supports & Retired Lee McSpadden
One Big Day for Mechanical Insulation - Thursday, February 7th at Pasadena Convention Center

2019 EXPO & Byron Sadler Craft Competitions Schedule
Wednesday, February 6, 2019
7:00 AM – Noon - Phoenix decorating pipe/drape set up
Noon – 5:00 PM Exhibitor move in Pasadena Convention Center Exhibit Hall

5:00 PM – 7:00 PM – “Exhibitors Appreciation Reception” Exhibit Hall Pasadena Convention Center

Thursday, February 7, 2019
8:00 AM – 10:00 AM – Exhibitor final move in materials
10:00 – 11:00 AM – Peter Beard, Greater Houston Partnership – Workforce program
10: 30 AM – Rigid, Removable, Commercial Craft Competitors check in/orientation
11:00 AM – Morning flight of contestants report to models for installation competition
• Afternoon flight contestants report to written test room.
11:00 AM – Exhibit Hall Opens
11:30 – 2:00 – Lunch served
Noon – 1:00 PM – Ron King – Thermal Insulation Inspectors Program Certification
2:00 PM – Morning competitors report for testing, Afternoon flight of contestants report to models
2:00 – 3:00 PM – Michael Bergen Industrial Info Resources Update
5:00 PM – Competitions end. Contestants change to company shirts for Awards Ceremony
5:30 PM – Exhibits close. Awards Ceremony.
Competitors Needed for All Competitions

Cryogenic Competition was held offsite at Rilco Manufacturing on January 15th using PIR products and won by Petrin LLC.

Removable/Reusable Pad competition current Trophy Holder to beat is Brock Group.

Rigid Competition will use an Aerogel product and the current Trophy holder to beat is BrandSafway.

The Commercial Competition current trophy holder is Building Specialties.

Do You have what it takes to take the trophy away from the above and home for your company???
Thank You Sponsors FOR YOUR SUPPORT for 2019 SWICA Byron Sadler Craft Competition

GOLD SPONSORS

BRAND SAFWAY™

PLATINUM SPONSORS

Morgan Advanced Materials

THERMAL CERAMICS

RILCO

Petrin, LLC

A Brown & Root Company

Rilco Manufacturing also provided their facility for committee meetings and the 2019 Cryogenic Competition.
Thermo-1200™ Calcium Silicate

Our new, water resistant Thermo-1200 inhibits water absorption. This allows additional time and flexibility to install the jacketing should you ever get caught in the rain.

- Water-resistant calcium silicate sheds water to protect the product from the rain
- Offers metal crews more time to install the jacketing when a storm passes through*
- Provides flexibility that can save time and money during installation
- Includes XOX Corrosion Inhibitor® to help inhibit CUI

* See data page for complete details

February 2019

WEATHER THE STORM
CUSTOMER-DRIVEN INNOVATION
There Are No Miracles....Just a great Team to Make things Happen!!

Special thanks to the Expo/Byron Sadler Craft Competition Committee and the companies that support their dedicated Involvement. It takes a village!

First, Petrin LLC has loaned SWICA Jay Bridge-water to chair the Expo Committee with his tentacles in every direction. Specialty Products & Insulation (SPI) has long stepped forward transporting our models to the site and assembling each for competition by Mark Rich & Mike Feehery. Ron Roth is in charge of materials and getting them packaged on site. SPI is a materials supplier. Daniel King, Bay Insulation is a materials supplier, got speakers and will do competitor orientations. Also with materials supplied, Jeff Murphy with Distribution International also got judges for the events. Ken Zagorski, Rilco Manufacturing, donated his facility and worked with the Duna USA team of Dave Francis and Franco Sala to get assembly drawings and cryo competitor data. Rilco will supply personnel to give safety orientations. Ginny Gier, MIT/DI marketed event to competitors and got their registration and competition data to them. Vince Darder, BrandSafway helped with competitor procurement. John Havey, Talon and Michael Alcorn, Aspen Aerogel will proctor Cryogenic testing with Matt Ball of Johns Manville. Jenny Ferrell, Coastal Plains will do competitor registration with Ginny Gier - MIT.
Trent Lesikar, Petrin LLC, with Shawn Camfield, Camfield Creative will be the video on site at the Cryo Competition to show at Expo. Camfield has also upgraded website and provided electronic marketing for all events. Mark Stripling, HB Fuller and Adam Whitney, Rockwool Technical will provide help with setup and teardown.

David Patrick, Apache Industrial, has provided input for Cryo and Rigid competitions based on past competitions and will help with scoring with Mike Feehery, SPI. The Grievance Committee is Victor Morales, Bay Insulation, Michael Alcorn, Aspen Aerogel and Jay Bridgewater, Petrin LLC.

Bobby Ferrell, Owens Corning Foamglas was point in creating this Cryo Competition held at their facility in 2017 and interfaced with support data for 2019 and is chair of the judges committee. He will do judges orientation and has been supportive that judges get packages prior to competitions and grievance committee is to attend orientation. Cryo judges giving their time and expertise are: Bobby Ferrell, OC Foamglas, DJ Page, Thermal Insulation, Lee McSpadden, retired, Toby Grebe, SPI and Howard Lavender, Dow (Cryo only). Bill Brayman, Brayman Consulting will join rest for the Rigid, Removable and Commercial Competitions February 7th at Pasadena Convention Center. The team has met 4 times and will step up with time and resources day of the events. These are time and funding intensive events. Many of the committee were also sponsors. In a big word

Thank You!
Welcome CLH Strapping as New Associate Member

This is a renewed membership and we’re glad to have Chris Huck and CLH Strapping back with SWICA as a new associate member. Chris will be with Protecto Wrap Company at the SWICA trade show in booth # 111 so drop by and say hi. You can reach him at:

Welcome Corick Valve Covers, Inc as New Associate Member

Corick Removable / Reusable Insulation Valve Covers are specially designed for use on Chill Water, Heating Hot Water, and Domestic Water valves and equipment. When properly installed Corick Removable / Reusable Insulation Valve Covers effectively retard heat gain, and prevent condensation or frost formation on cold equipment. They also effectively retard heat loss when used on hot equipment.

A UNIQUE COMBINATION OF MATERIALS AND ASSEMBLY

The Corick Valve Cover offers substantial savings over traditional methods of fabrication and installation. The one inch thick cover also meets industry standards in all of these important categories.

Each one of our custom made covers can be used at temperatures ranging from 35° F to 200° F. All standard sizes are available ranging from 2.5” to 8” featuring a 25/50 fire rating. Larger

The Optimal Chilled Water System

PolyPhen®

The optimal chilled water insulation system: RG-CHW® on the pipe to stop corrosion, PolyPhen® phenolic closed-cell foam insulation, and Alumaguard® Lite White zero perm vapor/weather barrier jacket.

System Advantages:

- Quality closed cell, efficient Phenolic insulation
- Easy to fabricate in both field and factory
- Highest R-Value per inch
- Meets ASTM E84 flame/smoke up to 4 inches
- Available in 4 densities: 2.5, 3.75, 5.0, 7.5 PCF
- Zero-Perm weather/vapor barrier suitable for outdoor use

Since 1952, Protecto Wrap Company has been manufacturing waterproofing membranes with a sound reputation for producing some of the highest quality waterproofing systems available. Our products meet or exceed the design requirements and specifications for a variety of applications. Protecto Wrap offers design consultation and field technical support for all product lines, which include residential and commercial waterproofing membranes on:

- Foundations/Decks
- Window and Door Flashings
- Roofing Underlayments
- Flooring Underlayments
- Energy Systems

Don’t let water take hold of your pipes.

**SWICA Newsletter Goes Electronic**

This is the last printed SWICA Newsletter. In the future it will be distributed electronically to a much larger base. If you don’t get one or want to add someone please contact us with data. We will continue to distribute every other month... so next is in April. Besides information timely to our region you will now be able to click on advertisers ads and go to their website as an added value to all. You can also print it out or parts you find you might want to share in your lobby or information board. As always we are looking to you to provide information about your company, new products and any personnel changes that impact our region. We’re here to serve you.

---

**Aerocel ULP™ Insulation**

Aerocel ULP™ is ideal for hot and humid climates where moisture is always a problem. It is:

- Cost effective alternative to cellular glass and other rigid foams
- Lowest permeance value of .005 perm-inch / lowest absorption rate of .1% by volume
- Ultra-low water vapor transmission—system stays sealed against moisture
- Ideal for extreme hot or cold high-humidity/high-moisture applications

For more information go to: www.aeroflexusa.com/ULP  
Or call: 1-866-237-6235 (1-866-AEROCEL)
Taking action saves lives

There are several options when facing an active shooter situation: run, hide or fight. “Make the best decision you can as quickly as you can,” advised Sgt. Neal Bohannon of Tactical Edge. “You need to do something. Doing nothing is a surefire way to find yourself dead.”

If possible, Bohannon said to run, evacuate and avoid the shooter. “It’s much harder to hit a moving target. Getting your body moving increases your survival rate by 90%.”

He recommended knowing where the exits are in a location. “Do you know where they are and have you been through them? Under stress your body changes — noise sounds more muffled, you get tunnel vision and all of the blood rushes away from your extremities and towards your organs, causing you to lose fine motor skills, such as using a key to unlock a door in a shooting situation. Your mind starts looking for something it can relate to and you freeze and don’t move.”

If it isn’t possible to leave the area, taking cover and concealing yourself is the next option. Cover can save you from gunfire if it is something solid like steel or concrete. “If you put multiple textbooks together, you can stop a bullet,” shared Bohannon, “a single textbook won’t stop a bullet. Concealment hides you from the shooter’s view, but it won’t stop a bullet.”

Employees who have to take cover in a work environment have mere seconds to take action. Bohannon emphasized the importance of pre-planning. “Think about your work environment and space. Understand the capabilities of your space — does the door lock? Which way does it swing? Are there windows in the doors? (These can be covered.) Are there
windows in the room? Do they open or can they be broken? If you’re on the first or second floor, you can escape out of them.”

He also advised identifying any dead space in a room — some place that may not be visible from outside of the door. In a classroom, one teacher could stand outside of the door while another teacher moves about the room to find the dead space. Bohannon said to place a mark on the floor to indicate the dead space spot. Consider items that can be used to barricade the door — computer cords, rope, tables or a doorstop can hold the door if it opens to the inside. Shoestrings or lanyards can be used to tie a door shut. A belt over a scissor hinge or pull bar can also prevent it from opening.

If the last option is to engage the shooter, act as aggressively as possible against him or her. “If you are face-to-face with a shooter — you can voluntarily surrender your life or you can fight for it,” stressed Bohannon. He recommended throwing items, yelling at the shooter or using improvised weapons. “Fight with everything you have like your life depends on it, because it does.”

It will be necessary for someone to act first to attack the gunman. “If you do, chances are that others will follow you,” advised Bohannon.

Unfortunately, the key to improving your chances of survival in an active shooter situation involves taking immediate action. In public areas look for exits, possible places to hide or barriers that provide a measure of protection. Pay attention to your surroundings — your life depends on it.

Paid Family Leave Benefits Saw Major Gains in 2018

December, 2018

Benefits Pro.com

As the labor market tightened in 2018, organizations turned to one benefit in particular to attract and retain U.S. employees: Paid family leave.

After Starbucks Corp. and Walmart Inc. extended paid time off to hourly workers in January, 18 more large companies followed suit. As a result, an estimated 4.8 million people had access to more generous paid leave benefits this year, according to data compiled by PL+US, a paid leave advocacy organization.

Many employers, like General Mills Inc., increased the amount of paid time off available to new moms and added the benefit for new dads, too. Paid time off to care for a sick relative or loved one is also on the rise, the survey found. About a dozen companies now say they offer paid caregiver leave, up from just two in 2017.

The U.S. remains the only high-income country that fails to provide paid family leave, and companies have typically only extended their benefits to salaried or full-time workers. This year, that started to change. In addition to Starbucks and Walmart, H&M, Dollar General Corp. and Darden Restaurants Inc. extended their policies to cover more classes of workers. Now more than half of the 57 largest employers tracked by PL+US now offer the same amount of leave time to all classes of employees.

“When a few big companies implement a policy there’s a little bit of follow the leader,” said Annie Sartor, an advocacy director at PL+US.

“They’re leveling up.”

They’re also getting pressure from their employees. Millennials, now the biggest demographic in the U.S. workforce, have pushed for paid family leave as they age into parenthood. At H&M, union members worked for two years to get paid
family leave for part-time workers; their new contract, signed earlier this month, includes the expanded coverage.

“When employees demand it companies have to respond, especially when unemployment is so low,” Sartor said.

Workers aren’t alone in advocating for better family benefits. Earlier this year Microsoft Corp. announced that it would require the companies it contracts with to provide at least 12 weeks of paid time off at the birth or adoption of a new child, establishing the influence a big company can exert over its business partners.

Even so, most employees — 83 percent, according to the Bureau of Labor Statistics — don’t have access to paid family leave. The federal Family Medical and Leave Act guarantees 12 weeks of unpaid leave for certain workers. The policies at many major employers don’t cover large swaths of workers. Contract workers in particular, who make up nearly 7 percent of the workforce, are still largely excluded, though that too is under scrutiny: Google employees recently lobbied the company’s CEO demanding more generous coverage for the tech giant’s contractors.

www.benefitspro.com
point forward will be emailed and posted on our website. The SWICA newsletter has been and will continue to be a staple of our association and to our members.

We have begun the formation of other committees within SWICA. The purpose of this is to allow our members to get involved with our mission, planning of events etc. With each committee a board member will chair. One of the newest is our Membership committee, which will be chaired by board member Ralph Parrott with Owens Corning. Thank you Ralph. More to come on this later and at our 2019 Conference in Boca Raton, FL. Which at time there will be the opportunity to sign up and get involved.

Remember PPE, participate, plan and execute.

Special thank you to Jay Bridgewater our VP / Expo Chair, the Craft Competition committee,
our volunteers, judges and everyone else for their hard work bringing this Expo and craft competitions all together. Just too many people to thank.

Would like to welcome our new members and thank you for joining our association. We are glad you joined and look forward to having you involved and part of the SWICA family.

Hope everyone enjoys our Expo and look forward to seeing everyone there.
Keep calm and carry on insulating.

Daniel King
SWICA President

As a national industrial insulation contractor, Miller Insulation is equipped to install all types of thermal insulation systems for a wide range of applications. From power generating plants and petro-chemical refineries, to ethanol and food processing plants, we have experience in a vast array of projects.

With an OSHA incident rate and EMR well below industry average, coupled with superior workmanship and on-time delivery, Miller Insulation is placed as a preferred contractor with a variety of firms.

Project Managers at Miller Insulation use the latest and most advanced software programs to manage the construction process, estimating through project completion. Miller Insulation has fine-tuned advanced processes to result in outstanding craftsmanship for the customer.

With the SSL II® double closure system providing a superior seal and ASJ Max polymer jacket resisting mold and mildew growth\(^1\), Owens Corning® Fiberglas™ Pipe Insulation is tailored to fit and tailored to perform for any application. Flex core compresses over copper and some small-bore iron pipes and fittings, saving time by eliminating the need to fillet. Rigid core provides fast and easy fabrication on larger pipes. Used to insulate pipes with operating temperatures between 0°F (-18°C) and 1000°F (538°C) (with heat-up schedule). Also available in No-Wrap and metric sizes.

Learn more at [www.owenscorning.com/mechanical](http://www.owenscorning.com/mechanical) or call 1-800-GET-PINK®

\(^1\) ASJ Max jacket does not support mold growth when tested in accordance with ASTM C 1338.
